OBJECTIVE:

Master's student in Computer Science at the University at Buffalo and an aspiring Full-Stack Developer. Skilled in React.js, Node.js, Spring Boot, and cloud deployments, with experience building scalable web applications, REST APIs, and data-driven solutions. Looking for a developer role to contribute to impactful projects using modern web technologies.

EDUCATION

University at Buffalo

Aug 2024 - Present

Master of Science, Computer Science and Engineering

Relevant Coursework: Deep Learning, Machine Learning, Operating Systems, Algorithms, Data Models and Query Languages, Computer Vision, Data Intensive Computing

Dayananda Sagar Academy of Technology

Dec 2020 – May 2024

Bachelor of Technology, Computer Science and Engineering

Relevant Coursework: Data Structures, Design and Analysis of Algorithms, DBMS, OS, OOP, AIML, UI Design, IOT

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, JavaScript

Web Development: React.js, Angular, Node.js, Flask, Spring Boot, HTML5, CSS3, Bootstrap

Data Management: SQL, MySQL, PostgreSQL, MongoDB, Firebase

Cloud and DevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, CI/CD(GitHub)

Tools: GitHub, Git, RESTful API, VSCode

Frameworks & Libraries: Python Libraries (PyTorch, TensorFlow, Scikit-Learn, NumPy, Pandas), Apache Spark

Core Skills: Data Structure & Algorithms, OOP, SDLC, Agile

COMPUTER SCIENCE PROJECTS

CartRush: React, Node.js, Express, MongoDB, Stripe, AWS

- Built a full-stack e-commerce platform with product catalog, shopping cart, and secure user authentication (JWT).
- Integrated Stripe payment gateway to enable real transactions.
- Deployed on AWS EC2 with CI/CD pipelines, ensuring scalable and reliable performance.

LinkUp – React, Node.js, Socket.io, Redis, Docker

- Developed a WhatsApp-like chat app with one-to-one and group messaging, presence indicators, and message persistence.
- Implemented Web Sockets for real-time communication and Redis for efficient message queueing.
- Containerized using Docker, making the application portable and easy to deploy.

FinTrack — React, React Native, Firebase, PostgreSQL

- Created a cross-platform app for tracking expenses, budgets, and savings insights.
- Integrated data visualization charts for spending analytics.
- Implemented secure user authentication and cloud data sync with Firebase.

WORK EXPERIENCE

Coding Assistant, University at Buffalo, Buffalo, New York: June 2025 – Present

- Engineered data pipelines to process and clean large-scale food, nutrition, and health datasets for machine learning applications.
- Developed Python-based ETL scripts for data extraction, transformation, and validation, improving model training efficiency.
- Contributed to a carbon footprint calculator for campus dining recipes, supporting university-wide sustainability goals.

Software Engineering Intern, Compsoft Technologies, Bengaluru, India: June 2023 – December 2023

- Developed and deployed full-stack web applications using React.js and Java Spring Boot, ensuring responsive design and high performance.
- Designed and integrated RESTful APIs with MongoDB, enabling real-time data rendering and seamless data management.
- Automated workflows with Python scripts, reducing manual effort and improving operational efficiency.
- Contributed to cloud deployments on AWS, containerizing services with Docker and orchestrating with Kubernetes for scalable microservices.
